

DIPANKAR SAHA

Senior Full Stack AI Engineer

React • Next.js • TypeScript • Node.js • NestJS • Python • AI/LLMs • RAG • AWS • Kubernetes • Microservices

West Bengal, India (Open to Remote & Relocation)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **6 years of experience** designing, developing, and deploying scalable enterprise web applications and cloud-native microservices. Expertise in **React, Next.js, TypeScript, Node.js, NestJS, AWS, Docker, Kubernetes, PostgreSQL, and Microservices Architecture**. Growing hands-on experience building **AI-powered applications** using LLM APIs, Retrieval-Augmented Generation (RAG), vector databases, AI workflows, and event-driven systems.

Experienced in leading technical discussions, designing scalable architectures, mentoring developers, improving engineering practices, and delivering secure, production-ready software for distributed global teams.

CORE SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS
Backend:	Node.js, NestJS, REST APIs, GraphQL, gRPC, JWT, OAuth2
AI & LLM:	OpenAI API Integration, Retrieval-Augmented Generation (RAG), Embeddings, pgvector, Vector Search
Cloud & DevOps:	AWS (EC2, S3), Docker, Kubernetes, Nginx, GitHub Actions, CI/CD
Databases:	PostgreSQL, MongoDB, MySQL, Redis
Observability:	OpenTelemetry, Prometheus, Grafana, Jaeger, Loki

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Innoways (Remote – Hong Kong) | March 2023 – Present

- Designed and developed enterprise-scale SaaS applications using React, Next.js, TypeScript, Node.js, and NestJS.
- Led architecture discussions for scalable cloud-native applications following microservices architecture.
- Designed modular backend services with REST APIs and event-driven messaging.
- Built reusable frontend components and improved application maintainability through component-driven architecture.
- Implemented secure authentication and authorization using JWT and Role-Based Access Control (RBAC).
- Optimized MongoDB aggregation pipelines and MySQL queries to improve application performance.
- Containerized applications using Docker and deployed workloads to Kubernetes clusters.
- Built automated CI/CD pipelines using GitHub Actions.
- Participated in architecture reviews, sprint planning, technical design discussions, and code reviews.
- Mentored junior engineers and promoted engineering best practices across the team.

Technologies: React • Next.js • TypeScript • Node.js • NestJS • Docker • Kubernetes • MySQL • MongoDB • RabbitMQ • AWS • GitHub Actions

Software Engineer

Tata Consultancy Services (TCS) | April 2021 – March 2023

- Developed enterprise insurance applications for Zurich Insurance using Angular and Node.js.
- Built scalable REST APIs and frontend modules supporting high-volume business workflows.
- Worked closely with distributed teams following Agile/Scrum methodology.
- Fixed production issues while maintaining high application availability.
- Participated in code reviews and delivered high-quality software following enterprise standards.
- Improved application performance and reduced production defects through proactive optimization.

Technologies: Angular • Node.js • JavaScript • REST APIs • MySQL • Git

Software Engineer

Asparrowtech | June 2020 – December 2021

- Developed responsive web applications using JavaScript frameworks and Node.js.
- Built backend APIs and integrated third-party services.
- Worked on database design, application enhancements, and bug fixes.
- Collaborated with clients to deliver custom software solutions.

SELECTED PROJECTS

AI-Powered Event-Driven Notification Platform

Designed a cloud-native notification platform using event-driven microservices capable of intelligent notification routing.

Key Features: Event-driven architecture, gRPC communication, RabbitMQ messaging, AI-assisted decision engine, multi-channel notifications, Kubernetes deployment, OpenTelemetry-based observability, PostgreSQL, Redis.

Technologies: Node.js • NestJS • PostgreSQL • RabbitMQ • Docker • Kubernetes • OpenTelemetry

EDUCATION

Bachelor of Technology (Computer Science & Engineering)

Siliguri Institute of Technology | 2016 – 2020 | CGPA: 7.70

PROFESSIONAL STRENGTHS

Full Stack Architecture, Event-Driven Architecture, AI-enabled Product Development, Microservices Design, Cloud-native Engineering, Technical Leadership, System Design, Secure API Development, Performance Optimization, Cross-functional Collaboration, Mentoring Engineers, Agile Delivery, Scalable SaaS Platforms

ADDITIONAL INFORMATION

Languages: English, Hindi, Bengali

Work Authorization: India • Open to Remote Opportunities • Open to Relocation

Continuous Learning: Currently expanding expertise in AI Engineering, LLMOps, Agentic AI, FastAPI, Production RAG Systems, MCP, and Enterprise AI Architectures.
